

DVD Xpress

Save Your Memories to CD or DVD

- Simple and easy video capture on your PC
- Convert your Video collection (VCR, camcorder, DVD) to a DVD (MPEG-2) or CD (MPEG-1)
- Share and watch your DVD on any home DVD player
- Capture Video Direct to DVD or CD in Real Time

Now there is a fun and easy way to get all of your old VHS tapes on to CD and DVD so you can preserve your family treasures for a lifetime. Capture, edit, and share your home movie collection on Video CD or DVD disk and share with friends and family. One simple USB connection to your PC and you are ready to archive all your home movies direct to disk.

DVD Xpress provides simple steps to get started capturing and publishing your video, you can even capture straight to disk in one simple step, yet it also includes video editing and DVD authoring tools that let you unleash your creative talents with video editing and effects.

- USB 2.0 connection to the PC, backward compatible to USB 1.1
- Capture audio and video via the USB port with "Audio-Lock" technology for perfect lip synch
- Capture from any analog video source in MPEG-1 or MPEG-2 video formats including VCD, SVCD and DVD formats via RCA (Composite) or S-Video inputs.
- Use temporal and spatial video pre-processing filters to help reduce noise on old VHS tapes or TV signals.
- Capture DVD (MPEG-2) at video bit rates from 2 Mb/sec. up to 15 Mb/sec. (up to 6 Mb/sec. for USB 1.1 connections)
- Supports MPEG 1 Layer 2 compressed Audio
- Capture using Constant or Variable bit rates and other custom settings.
- Brightness, Contrast, Saturation and Hue controls
- Use DVD MovieFactory 3 to capture and then burn to disk in quick, simple steps.
- Utilizing the Cirrus Logic 2199 DVD Encoder chip found in professional DVD recorders and players
- Compatible with all CD & DVD writers.
