5.5. Folder names

The Mobile Data Copier copies the data on the target device. It automatically creates a folder named 'sync001'. If the 'sync001' folder already exists on the target device it will automatically create additional folders named 'sync002', 'sync003', 'sync004', etc. This ensures that each operation will not overwrite the existing data and files.
5.6 Error Messages

There are 3 possible warning messages:

- Source Disk Error   : Check the source device
- Target Disk Error   : Check the target device
- Target Disk Full   : The target device is full, remove data from the target
                        : device before continuing.

5.7 System Information

The 'System' option in the main menu shows the current firmware version.

```
USB  CF  MS  USB   ▱▰
VERSION:        1.04
```

5.8 Power Off

- To turn off the Mobile Data Copier press the 'Power/Command' button for two seconds.
- When turned on and not used the Mobile Data Copier will automatically turn off after 60 seconds.

6.   Installing the Cardreader

The Mobile Data Copier can also be used as a memory card reader when connected to a computer via the supplied USB cable.

6.1 Windows XP, 2000 SP3 & ME

Please update **Windows 2000** to Servicepack 3 or higher before continuing installation. Servicepacks can be downloaded free of charge from Microsoft

website (www.microsoft.com)

- Windows XP, 2000 SP3 & Windows ME **do not** require software installation. Native Windows drivers are used to install the card reader.
- Connect the Mobile Data Copier via the USB cable to the USB port of the computer. Turn on the computer and the system will detect and install the reader/writer.
- Check 'My Computer', there should be four removable disk icons added representing the media slots.

6.2 Windows 98SE

Note: Install the software before plugging the Mobile Data Copier into the USB port!

- Place the CD-ROM in the CD drive and browse to the 'Drivers' folder. Run the setup.exe file. Windows will start installing the Sitecom card reader.
- The InstallShield wizard will start, follow the on-screen instructions to install the software.
- Restart the computer when requested.
- Connect the Mobile Data Copier via the USB cable to the USB port of the computer.
- The system will detect and install the new device.
- Check 'My Computer', there should be four removable disk icons added representing the media slots.

6.3. Using the Reader

- Insert a storage card into the reader.
- Open 'My Computer' or 'File Explorer'.
- Double-click on the correct Removable Disk icon.
- Access images and files on your storage cards the same way you open, copy, move, or delete images and files on your normal hard disk drive.

Saving pictures to your computer from the Removable Disk

- Locate or create a destination folder you wish to transfer the picture files to on your computer. (i.e. create a new folder on the desktop)
- Open **'My Computer'** or **'File Explorer'**, open the folder containing the picture files on the Removable Disk Drive in the card reader. Go to the edit menu and choose **Select all**.
- Go to the edit menu and choose **Copy**.
- Go to the destination folder.
- Go to the edit menu and choose **Paste**.
- The pictures will be copied to the destination folder.
